Personal Profile

I am a self-motivated individual who values accuracy over speed. If something is worth doing, it's worth spending the time to make sure it's done right. I feel I have the skills necessary to complete any task I am set and should there be anything unfamiliar I will learn how to accomplish it through diligent research and learning. I am also very goal-oriented and am able to work to deadlines with no supervision necessary. I would be keen to undertake any and all training to enhance my chances of becoming a more productive and valued member of your permanent staff. Overall, I am eager to work and I am available immediately.

Notable Skills

- Significant experience in working with Java, C# and Oracle's implementation of SQL.
- Reliable and trustworthy
- Proficient in the use of basic office application packages, such as Word, Access and Excel
- Experienced in managing team projects

Work History

June '21 to Present - Full Stack Developer for Nudge Exchange Ltd

My role at Nudge consists of maintaining and developing new features for the Nudge backend API, developed within C# and hosted on AWS. I would also assist in development of frontend pages using React/HTML/JScript. I also, when necessary, made adjustments and additions to the website's MySQL database.

Also involves some DevOps responsibilities.

October '15 to December '15 - Customer Service Advisor for Teleperformance (Seasonal work placement)

During this work placement, my role consisted of answering customer calls on behalf of Tesco stores. These calls were very varied in nature. I navigated the company's computer system to acquire information relevant to the customer's particular request. Many of the calls included lost property requests, which meant contacting different stores for further information. I also registered information related to the call such as length, subject matter and any miscellaneous details.

November '11, Administration Assistant for VWS Westgarth (School work experience)

Due to my interest in computers, I was placed in the IT department within VWS. The department carried out computer repairs as well as doing the initial set up. Whilst there, I learned how to set up a computer with an OS and an antivirus program. I also learned how an IT department operates within a large organization.

Education

University of the West of Scotland

□ **September 2019 - June 2020**

BSc Computing Science

City of Glasgow College

September 2016 - June 2018
